

For Bilious Attacks

Here is help for you. Your bilious attacks may be both prevented and relieved, but prevention is better than cure. The means are at your hand. When a dull headache, furred tongue, yellow cast to the eyes, inactive bowels, dizziness, or a sick stomach, warn you of a coming bilious attack, resort at once to

BEECHAM'S PILLS

which act almost instantly on the liver and bowels, and quickly regulate the flow of bile. A few doses of Beecham's Pills will correct the stomach, put the blood in order, relieve headache and tone the entire system.

For over sixty years, on land and sea, Beecham's Pills, by their safe and thorough action on the stomach, bile and bowels, have maintained their world-wide reputation as

The Best Bile Medicine

Bottles 10c. and 25c., with full directions.

TOTAL ECLIPSE TO BE SEEN IN UTAH

According to the astronomical calculations, residents of Ogden and in fact of the entire country, will witness a total eclipse of the moon on November 27. It is said that the phenomena will be visible to this locality about ten minutes after midnight, and is expected to continue in a state of eclipse for from an hour and a half to two hours. Lunar eclipses are caused by the passage of the moon into the earth's shadow, and while not as frequent as solar eclipses, the ratio being about three to two, as far as the ordinary observer who must content himself with the naked eye is concerned, it would appear otherwise, as it is only in certain localities that the solar eclipse is generally visible, all things favorable, from about half the earth.

Even under the most favorable conditions the solar eclipse never lasts longer, as a total eclipse, than about eight minutes, and this is only in some parts of the equator, while the moon in total eclipse will last about two hours, and two hours more from the time the edge of the moon first passes into the shadow of the earth until it passes out.

Except in times of storms the moon is still visible while in total eclipse, showing a sort of dull copper colored light, which is said by astronomers to be the sunlight reflected around the earth into its own shadow by the refraction of the earth's atmosphere.

The partial eclipse of the moon is much more frequent than the total. Astronomers say that the partial eclipse is caused by the moon passing either to the north or south of the shadow thrown by the earth without going directly through it. The average number of partial eclipses per year is about four, two solar and two lunar. It is said that the smallest number which may occur is two, and in this instance both are solar, while the largest number ever known to take place within a year was seven. While the moon controls the tides of the ocean, it is said that an eclipse has no effect whatever on them. The solar eclipse is much more valuable than the lunar from a scientific point of view in fact, were it not for the opportunities given astronomers to study the surface and constitution of the sun in times of partial or total eclipse, when the sun's brilliancy is greatly lessened, it is probable that comparatively little would be known about the planet which furnishes us with light and heat.

It is said that the present knowledge of the sun was nearly all gained by observations made during what is called the most remarkable series of eclipses in history, between 1860 and 1871. Most of the phenomena observed during this period was more plainly visible in Spain than in any other part of the world. One of the most peculiar features of the lunar eclipse is the fact that to the naked eye the line of the earth's shadow as the moon passes into it is plainly visible and sharply defined, but when a telescope is used, instead of growing plainer, this line fades into a hazy blur. In the ancient times eclipses were used to mark events. The date of the Christian era is said to have been determined by a lunar eclipse on the night before Herod died. The word "eclipse," from the Greek, taken literally, is a medical term meaning faint or swoon.

Convalescents.

After Typhoid or other wasting diseases or low fevers.

Require a pure, gentle, invigorating stimulant and tonic to aid digestion, stimulate and enrich the blood and to ground new strength to body and brain. Duffy's Pure Malt Whiskey is invaluable as a tonic when you are run down, depressed, when the heart is weak and the blood sluggish, it builds new tissue. It assists failing nature to resume its functions, insures refreshing sleep and imparts vigor and energy to every part of the body. It invigorates the brain.

Thousands of doctors prescribe it, and leading hospitals use it. The standard of purity and excellence for 60 years. Duffy's Pure Malt Whiskey has brought health and happiness to many thousands of homes during the last half-century. Its virtues have been endorsed by temperance advocates, clergymen, scientists, and men of letters in all walks of life, who cannot say too much in praise of the world's greatest medicine.

Be sure you get the genuine—imitations are numerous and dangerous. Refuse substitutes. All druggists and grocers, or direct, \$1.00 a bottle. Write us if you are sick, it will cost you nothing to learn how to treat yourself. Medical booklet and testimonials sent free.

Duffy's Pure Malt Whiskey Co., Rochester, N.Y.

CLOTHESLINE REEL

Line Can Be Drawn in and Out of Clothes Removed Without Walking.

For flat houses or wherever clothes are dried in small places and are difficult to access the clothesline reel designed by a Missouri man will be a great help.

With this reel a line of clothes can be drawn in to the post and the clothes removed with ease, without the necessity of making a sound of the line and collecting the garments in a basket.

HANDY FOR USE IN FLATS.

In cases where clothes are hung out of high windows to dry and it is impossible to make rounds of the line on foot, such a device is practically indispensable. At the top of the pole is a combination of pulleys through which the line passes, while near the bottom is the reel, around which one end of the line is wound. The clothes are hung on the line as it is pulled out, and when the time comes to take them in all that is necessary is to wind up the reel and take them down as they approach the pole. This also saves the trouble of carrying a basketful of the garments around.

SCIENCE NOTES

The Agricultural Department has for some time been engaged in the investigation of the subject of the preservation of seeds with the view of perfecting the official stamp of approval on some particular method. In the course of this work it has been discovered that the amount of moisture held by the air surrounding seeds, consisting of a few long and thin, pointed, and very dry factors in their preservation, and an effort is now being made to arrive at some mechanical means of regulating the air supplied to the seeds held for later consumption.

According to a note in the Scientific American, F. Fritz has discovered that the domestic cat possesses a peculiar organ of sense, consisting of a few long and thin, pointed, and very dry factors in their preservation, and an effort is now being made to arrive at some mechanical means of regulating the air supplied to the seeds held for later consumption.

By an arrangement combining the features of the stereoscope and the cinematograph, an improvement has been made in the manufacture of moving picture machines by which the usual irregularities of the display are avoided. This is accomplished by the opening and closing of the shutter as each of the tiny pictures on the film comes before the aperture and is displayed by the projection of a beam of light through it. The retention of the image on the retina of the eye is depended upon for the purpose of making the pictures apparently continuous, but this operation is imperfectly performed and the breaks between each picture are more or less noticeable. This is trying to the eyes of most persons, and while the recovery of the eye from it is often a matter of a few minutes, it sometimes results in severe headaches, so that many persons are deprived of the pleasure of witnessing these exhibitions.

By the substitution of pneumatic tires for the solid rubber tires of the stereoscope, a continuous moving picture is thrown on the sheet, the double lenses of the projectors being opened and closed alternately so that there is no break whatever in the series of pictures, one blending perfectly into the other.

A railroad motor inspection car, which can be changed into a road automobile by the substitution of pneumatic tires for the solid rubber tires of the stereoscope, has been built by the Chicago and North-western Company.

Typhoid fever carriers is the term applied to persons who may be infected by the typhoid germ and yet themselves free from the disease. According to statistics on 57 cases reported by various physicians, about three-fourths of all carriers thus far recorded are women, and with very few exceptions the carriers have been engaged in some occupation, such as cook, baker or dairymaid, which has enabled them to transmit the typhoid bacteria to food products, or they have been in contact with persons who have been infected by the typhoid germ. Dr. Albert believes that many people carry typhoid germs for a time without sickness.

DRIED APPLES.

While apples are plentiful, smoke a supply with sulphur and put them away for winter use. In the winter fry them in butter with sugar enough to sweeten. Keep the lid on the skillet to steam them until almost done, then fry brown. Pears may be prepared in like manner.

READ THE CLASSIFIED PAGE

WOMAN'S COLUMN

HOUSEHOLD NOTES.

If a warm iron is passed over stamps that stick together, they will come apart.

A teaspoonful of ginger in two gallons of cider will keep it sweet for several months. Botted cider should be placed in jugs and corked and kept in a cold place.

Persons who dislike to take olive oil for medicinal purposes will find it much more agreeable after adding a little salt. Salt is also medicinal when not taken in large doses.

Salt and buttermilk will clean copper teapots.

Children who awaken early in the morning are often content to lie in bed until the proper hour for rising if toys are provided for them.

A north window blooming plant, that demands no sunshine, having which yields blossoms, is the calceolaria. It requires a great deal of water.

A stiff paint brush which can be bought for 10 cents will be found useful for cleaning dwarf celery. It is almost impossible to clean celery with a vegetable brush.

BARGAIN-BUYING.

It is a triumph to purchase a hat when the season is over, provided it is very reasonable in price and is made up of good trimmings. The frame will be a dead loss, but the good trimmings can be used over and over again. Having been told by so many the importance of the daily bath and the necessity of often changing the little dress articles, she gave the baby a cold by over-attention, unnecessary baths, and the child died of quick consumption. The hygiene of today is all right in some respects and wrong in others. What will sustain one child, would not nourish another, and what one little fellow might endure in a vigorous bath would weaken another. The mother's instinct should be the very best adviser, but if lacking in this respect, then follow the direction of a reliable physician or nurse.

SCIENCE IN THE NURSERY.

A woman once said to me, "I washed my first baby to death." She sadly explained what she meant by "washing it to death." Having been told by so many the importance of the daily bath and the necessity of often changing the little dress articles, she gave the baby a cold by over-attention, unnecessary baths, and the child died of quick consumption. The hygiene of today is all right in some respects and wrong in others. What will sustain one child, would not nourish another, and what one little fellow might endure in a vigorous bath would weaken another. The mother's instinct should be the very best adviser, but if lacking in this respect, then follow the direction of a reliable physician or nurse.

HAIR COMBS.

The old-fashioned tortoise shell comb is again on the market, this time in immense moon-shaped or crescent combs that encircle the back and sides of the hair above the ears. The majority of these combs are not tortoise, for it is a most expensive shell, but the imitations are very handsome and are beautifully cut to imitate the rare old tortoise carved combs.

A new arrangement of the hair is to wear the braid almost against the face, which admits of the soft part at the front. The girl of today is wearing a silver ribbon over the parted hair next to the forehead, a pretty arrangement if the hair is dressed for evening.

KEEPING WHITE SHOES.

White canvas shoes should be washed, rinsed and dipped into clean bluing water. White kid should be cleaned with gasoline, naphtha or chloroform, and if not to be used, should be stuffed with tissue paper, powdered with talcum powder, and laid away in blue paper in their own box. The talcum not only whitens them, but preserves the soft leather. French chalk, pipe clay, dry flour and magnesia are the dry cleaners that may be used when shoes are dusty and not badly soiled. White tissue paper can be used to clean white leather shoes.

NOVELTY BRAIDS.

Narrow novelty braids have found a use at last, appearing as a very good trimming on house dresses where certain trimming details must be received. A disc made of a material which is useful to hold chiffon in place. The softer, wider braid is gathered into a little rosette which has its place among rosette decorations. Narrow novelty braids are often used as novelty braids, or often used as novelty braids, or often used as novelty braids.

MENDING TUBULAR OBJECTS.

When you break a piece of fine fabric which has a tubular projection, while it may be very easy to glue it together you will find it likely to break off again unless more securely fastened. The trunk of a very expensive Indian elephant (a china ornament), was broken, and the owner slipped a small cork into the broken part and adjusted both. Now the trunk is secure. The hollow handle of a valuable umbrella can be repaired in the same way, although a wooden piece is used instead of cork.

A NEW PROCESS.

A woman who found difficulty in drying her laundry, said she wrapped cold hangers with muslin and used them for holding waists and little girls' dresses. By stretching a wire near the stove, she could place a number of articles closely together, where formerly they were on a line across the kitchen.

WHEN BREAD WON'T RISE.

Heat an asbestos mat and place it under the bread crock, cover the crock with a blanket and bread will rise quickly. A bottle of lukewarm water, corked and placed in the jar will help bread to rise on cold mornings.

LININGS.

Much attention is given to linings since the return of the snug bodice. Upon this the fine dress depends almost wholly for its beauty.

CONSTRUCTION CO. IS HIGHLY PRAISED

The Wheelwright Construction Co., of this city has just completed nearly three miles of sidewalk for Mount Pleasant, Utah.

The mayor and city councilmen have sent the company a flattering letter of appreciation for the prompt and efficient manner in which the contract was fulfilled. After stating that the relations with the representatives and employees of the firm were uniformly pleasant the officials of the city add that the improvements are a source of pride to every public spirited citizen of Mount Pleasant, and that the work was high-class in every particular and that the officers of the little city adjusted every detail satisfactorily with the contractors without the slightest friction.

This is pleasing news to Ogden and demonstrates that Ogden is the undisputed headquarters for producing great construction concerns, there being a number of other Ogden companies who are operating all over the west.

NOTICE OF MEETING OF BOARD OF EQUALIZATION AND REVIEW.

Samuel Thomas, Geo. W. Wilson, T. S. Browning, C. J. Humphris, and J. B. Dana, having been duly appointed by the City Council of Ogden City, Utah, as a Board of Equalization and Review of the special and local taxes levied and assessed by ordinances published November 15th and 16th, 1909, upon property abutting on both sides of Barlow Avenue from 26th to 27th Streets, known as Sidewalk District No. 105; also upon property abutting on both sides of Washington Avenue from 26th to 28th Streets; both sides of 24th Street from Grant Street to the intersection of the Lincoln Avenue from 24th to 25th Streets; on both sides of Wall Avenue from 23rd to 24th Streets; and from 25th to 26th Streets, known as Paying District No. 106, hereby give notice that they will meet at the City Engineer's Office, City Hall, Ogden, Utah, from 9 o'clock a. m. to 5 o'clock p. m., for five consecutive days, commencing Tuesday, November 16th, 1909, to and including November 20th, 1909, and will remain in session on each of these days, during said hours, for the purpose of hearing any person feeling aggrieved and to make correction of any tax deemed unjust or unequal, and during the sitting of said Board, the special and local taxes levied and assessed as above stated, will then and there be open to public inspection.

By order of the Board.
SAMUEL THOMAS, Chairman.

Last publication November 19, 1909.

OGDEN HIGH IS DRILLING HARD

After last Saturday's victory over Granite, the Ogden High school football team have gotten down to real hard drilling and the boys are working overtime, getting in shape to give the Salt Lake High a severe drubbing on Thanksgiving Day. It is generally conceded that Capt. Douglass will not be in the game any more this time, as he is recovering from a bad cold. The rest of the team realize the extent of the loss of "Squaw" and they are working all the harder. The game the east benchers put up last week was a surprise to Granite and also to some of the local sports and if they progress as rapidly this next week, as they did last week, Salt Lake will not have a ghost of a show.

Reports from Salt Lake say that although that team defeated Payson by an overwhelming score, they are not allowing the grass to grow under their feet and are working hard to duplicate the trick here. They are not giving any allowances for surprises and are not letting up on their daily training.

The red and black followers expect to have a large crowd of rooters accompany the team here.

Headaches and Neuralgia from Colds LAXATIVE PHOMO Quinine, the world wide Cold and Cough Remedy, removes the cause. Call for full name. Look for the signature E. W. GROVE. 25c.

FUNERALS AND DEATHS

NEWMAN BLODGETT LAID TO FINAL REST

A very pathetic instance occurred yesterday, when the funeral of Newman Blodgett, of North Ogden was held. Mr. Blodgett's family are all ill with typhoid fever. His wife and children are all stricken with the disease first. He tenderly cared for them and nursed them when he was attacked with the disease. He succumbed and left his wife and four children still ill with the fever. At the funeral yesterday, but two of his family, who had successfully fought the malady were able to attend.

The services were held in the Lynne Ward meeting house, yesterday, at one o'clock. Bishop James Taylor, of the Eighth ward presided over the services. The music was furnished by the Eighth ward choir. A duet was sung by Reuben Wright and Miss Nora Lund, a solo by Ralph Smuin. The speakers were N. Reynolds, B. N. Blaylock, Bishop James Ward, North Ogden, David Mattson, Bishop George Smuin and Bishop Taylor. The body was interred in the North Ogden cemetery.

Dinsdale—Funeral services over the body of Benjamin Dinsdale was held this afternoon at 2 o'clock in the Marriott ward meeting house.

Robinson—Marie Robinson, the little daughter of John Robinson was buried yesterday at 1 o'clock from the home of Nicholas Gilbert, on Wilson Lane. The Rev. G. W. McCreery presided over the services and preached a very comforting sermon. Interment was made in the West Weber cemetery.

Bramwell—Funeral services over the body of Fred M. Bramwell, the lad who was electrocuted on the Telluride power line, was held today at one o'clock from the Lynne Ward meeting house.

Economy In Lighting and Cooking

If you have been reading our ads during October, you will remember we promised to give our reasons why a Corporation can take an interest in its customers' lighting and cooking bills by suggesting methods of economy. We can truthfully say that the prosperity of our customers is our prosperity. To teach people to cut down their lighting bills does not reduce the income as much as one would at first suppose, for the reason that when people discover a good idea, others will soon adopt it.

Another reason why we take an interest in teaching economy is that a pleased customer increases our business, while a dissatisfied one retards it.

Sometimes people are unconsciously extravagant with lights during the winter months, and the bill runs higher than they expect, and unless we suggest ideas for economy they will remain dissatisfied. Every properly adjusted gas stove and reasonable gas bill gets us additional consumers.

Our Motto is: Good service, attention to details, and reasonable bills for our consumers.

UTAH LIGHT & RY. CO.

GENERAL AGENTS

Have received the subjoined:

To Our Friends and Patrons:

The California Winery doesn't make a practice of tooting its own horn very much and therefore asks your indulgence for sending the following short item of news that came to us a few days ago by telegraph from Seattle, from The Alaska-Yukon Exposition.

"California Winery awarded gold medals for seven of its wines above all other California competition—Cordova, Sauterne, Claret, Zinfandel, Burgundy, Port, Sherry and Angelica. Silver medal for Riesling."

This is indeed good and gratifying news to us and will be welcomed, too, by our many friends and patrons. It is all the more satisfying because we were not aware the wines were being judged, and even at this writing, do not know who the judges were. We believe, therefore, that true merit must surely have provoked the awards to "Cordova," CALIFORNIA WINERY.

Very truly yours, CALIFORNIA WINERY.

E. M. SHEEHAN, Vice Pres. and Gen. Mgr.

Guard R. D. Paine, a brother member of the Veteran Firemen.
The remains of Mr. Whitehead's wife and daughter are buried in the city cemetery, and the graves have been looked after since his departure from the city, by the city chain gang under the supervision of Mr. Paine.
